Changelog

20.04

Added seachfield and –button

Added database and entries

Added Family-, Genus- and Species-names form the database to the webpage

Added picture of the found insect(s)

Added edit-link, it is still incomplete, but it's meant to be the admin-access to add new entries in the database

21.04

Added CSS-code to shine the webpage a bit up. This is not the final version, since it has to be implemented in the costumers webpage

Also updated the database, so it actually shows a real insect
